

**CUSTOM MAPS**

Sometimes the off-the-rack maps and plans that can be purchased don't fully fit your needs. Whether they highlight the wrong areas, include too much information, or simply have the wrong information they don't always fit your purpose.

With Canmap Hawley's survey and cartographic background we have the skills, knowledge and ability to create a fully customised map for whatever purpose you require. Based on your requirements we can create a map which emphasises the right bits and minimises the

unimportant bits to ensure that you will get your message across.

The maps can be electronic and suitable for placing onto your website with layers able to be turned on or off; they can be static and ready to go into your document or website for publishing as an image; or they can be anywhere in between.

If you would like to discuss what Canmap Hawley can do for you, contact us to discuss your options.
